

# Connect with Nursing and Health Care Experts

## On a Deadline? Contact us if you need:

- Experts to interview
- Article ideas, news, hot topics
- Human interest stories
- Quotes, opinions, and anecdotes from prestigious sources

Connect with the country's top leaders, researchers, clinicians, scholars, policy makers, and innovators in nursing and health care. Our experts sit on national and international panels, publish articles on the latest treatment breakthroughs, and care for patients in all health care settings. They will be glad to speak with you about a wide variety of timely health care issues.

Janet D'Alesandro  
Director of Media &  
Communications  
Anthony J. Jannetti, Inc.  
856-256-2422

# Specialties *and* Topics

## Medical-Surgical Nursing

---

Cancer  
Cardiovascular  
Care coordination and transition management  
Certification  
Complementary/alternative therapies  
Diabetes and endocrine disorders  
Gastrointestinal  
Geriatrics  
Healthy practice environment  
Infection prevention  
Leadership and professional development  
Mentoring  
Moral distress  
Musculoskeletal disorders  
Neurologic disorders  
Nutrition  
Pain management and addiction  
Palliative and end-of-life care  
Pressure ulcers and wound care  
Quality improvement  
Respiratory care  
Renal care  
Research and evidence-based practice

## Ambulatory Care

---

Academics and education  
Accreditation/organizational readiness  
Care coordination and transition management  
Certification  
Clinical operations issues (academic, managed care, group practice settings)  
Community nursing  
Complementary/alternative medicine  
Cultural sensitivity  
Disaster response  
End-of-life care  
Environmental health  
Evidence-based practice  
Health policy  
Informatics  
Interstate practice  
Leadership and administration  
Military nursing  
Legal issues  
Mentoring  
Nurse-managed clinics  
Nursing intensity and staffing  
Outpatient and ambulatory care clinics  
Patient advocacy  
Patient education  
Patient safety  
Policy and ethics  
Privacy issues  
Quality compliance  
Research  
Standards of practice and competencies  
Telehealth  
Workplace safety

## Nephrology

---

Administration  
Advanced practice  
Anemia  
Bone disease  
Cardiovascular impacts of renal disease  
Certification  
Chronic kidney disease (CKD)  
Collaborative practice issues  
Continuous renal replacement therapies  
Corporate/government issues  
Diabetes  
Dialysis  
Diet and nutrition  
Education (all areas)  
End-stage renal disease (ESRD)  
Ethics/ethical issues  
Hemodialysis  
Hepatitis  
Immunodeficiencies and renal disease  
Legislative issues  
Multisystem/co-morbidity issues  
Neurologic disorders  
Patient education  
Pediatric nephrology  
Peritoneal dialysis  
Pharmacologic issues  
Practice issues  
Professional practice  
Research  
Transplantation (renal and extra-renal)  
Vascular access

## Gerontology

---

Acute care for the elderly  
Adverse events  
Alzheimer's  
Comorbidity  
Continence/incontinence  
Dementia/delirium/depression  
End-of-life care/palliative care  
Endocrine/metabolic  
Frailty  
Health policy  
Health promotion  
Long-term care continuum  
Mental Health and substance abuse  
Motivating older adults  
Nurse practitioner education  
Nurse practitioner professional issues  
Nursing homes (quality of care, regulatory issues, policy)  
Pharmacology/polypharmacy  
Physical function  
Pressure ulcers  
Quality improvement  
Sensory impairment  
Transitions in care

## Urology

---

Advanced practice  
Bladder cancer  
Certification  
Continence/incontinence  
Genitourinary trauma  
Infertility (male and female)  
Interstitial cystitis  
Kidney stones  
Male and female sexual dysfunction  
Operating room  
Outpatient testing or procedures, urodynamics/bladder testing, biofeedback  
Pediatric urology (ambiguous genitalia, bed wetting, bladder exstrophy, congenital anomalies, hypospadias, testicular torsion, voiding disorders)  
Prostate cancer  
Renal cell carcinoma (kidney cancer)  
Robotic surgery/laparoscopic procedures (cystoscopy, kidney, prostate)  
Sexually transmitted diseases  
Testicular cancer  
Urinary tract infections (UTIs)  
Vasectomy or vasectomy reversal

## Nursing Economics

---

Advance practice nursing  
Big data  
Care coordination  
Care transitions/case management  
End of life  
Evidence-based practice  
Financial issues  
Global health and health care  
Health care reform  
Health economics  
Health policy, politics, and ethics  
Healthy practice environment  
Human resources  
Informatics  
Leadership  
Management and administration  
Medical errors  
Medicare  
Nursing quality  
Nursing shortage  
Nursing workforce  
Patient safety  
Primary population health care  
Quality health care  
Recruitment and retention  
Staffing issues  
Strategic planning

## Informatics

---

Clinical Decision Support Systems (CDSS)  
Computerized provider order entry (CPOE) systems  
Data and analytics  
Electronic health records (EHR)  
Implementation and optimization strategies  
Informatics  
Innovation in practice  
Leadership  
Metadata  
mHealth  
Mobile technologies  
Nursing informatics  
Patient safety  
Predictive analytics  
Quality improvement and patient outcomes  
Role and career development  
Safe practice  
System development, enhancement, evaluation  
Telehealth  
Training and support

## Pediatrics

---

Art therapy  
Asthma  
Chronic illness  
Critical care and cardiovascular  
Diabetes  
Early childhood development  
End-of-life care  
Ethics  
Evidence-based practice  
Family matters  
Home care  
Legislation and policy  
Managed care  
Mental health  
Nursing education  
Pain  
Pediatric management problems  
Primary care  
Public health  
Trauma
